PERSONAL SUMMARY

Full Stack Software Engineer with a proven track record in creating and maintaining complex backend systems and scalable web apps. Technical expertise includes building custom billing engines, payment gateways, inventory management systems, and protocols for embedded device communication. Combines deep technical execution with extensive experience in team management to bridge the gap between engineering and stakeholder requirements. Bosnian Citizen.

WORK EXPERIENCE

DSLON Wireless — ***Remote***
FULL STACK SOFTWARE ENGINEER — Jun 2024 – Mar 2026

- Engineered a multi-service management platform for Wireless, FTTH, IPTV, and VoIP using Next.js, tRPC, and Prisma, automating the full customer lifecycle from automated provisioning to retention workflows.
- Architected a granular RBAC system and multi-tenant isolation layer using Better Auth & Redis, securing 50+ API routes and ensuring strict data privacy across organizational boundaries.
- Developed a comprehensive logistics and inventory engine that tracks hardware from warehouses to customer sites, featuring Zod-validated bulk CSV processing and batch transaction history.
- Integrated RADIUS/PPPoE monitoring and diagnostic tools for real-time network troubleshooting and active session management.
- Built a gamified task management system with priority queuing and geographic assignment via Google Maps API, using a points-based model to automate field technician distributions.
- Designed a financial reconciliation engine and BI dashboards using PostgreSQL materialized views and Recharts, supporting multi-bank processing and automated balance tracking.

Trailfund — ***Remote, Contract***
FULL STACK SOFTWARE ENGINEER — May 2025 – Jul 2025

- Built a type-safe data onboarding engine using Next.js and tRPC, featuring a guided CSV/XLS import tool with real-time validation, mapping and editing for complex real estate datasets.
- Developed a full-scale settings dashboard and workspace engine giving users total control over their team invites, notifications, and custom CRM workflows like email templates and deal workflows without needing any code changes.
- Migrated the core database layer from Supabase to Prisma ORM

AP Agropromet — ***Gradačac, Bosnia and Herzegovina***
GENERAL MANAGER — Jan 2019 – Oct 2023

- Directed a workforce of 30+ personnel, overseeing integrated pest management (IPM) protocols and high-volume B2B contract negotiations with national retailers.
- Engineered and deployed business automation systems to digitize legacy manual workflows, optimizing labor tracking and inventory management.
- Managed end-to-end supply chain logistics and industrial processor relations to secure consistent distribution channels for bulk produce.

AP Agropromet ***Gradačac, Bosnia and Herzegovina***
OPERATIONS COORDINATOR Jun 2015 – Dec 2018

- Coordinated seasonal harvest schedules and labor allocation to ensure timely execution of agricultural operations.
- Supervised the application of chemical inputs and organized supply chain transport for daily regional deliveries.
- Facilitated internal communication between field teams and management to improve operational adherence to safety and quality standards.

SKILLS

Programming:	React, React Native, Typescript, JavaScript, HTML 5, CSS, C/C++, Golang, Docker, NextJS, NodeJS
API:	REST API, tRPC, Prisma, Drizzle
Database:	MySQL, PostgreSQL, MongoDB, Redis
Cloud Frameworks:	Vercel, AWS, Railway
Other:	Git, GitHub, Linux
Management:	Jira, GitHub Projects, Linear
Languages:	English, Bosnian

EDUCATION

BSc of Civil Engineering
University of Sarajevo, Bosnia and Herzegovina
